

# ABC Little House

## Dear Parents,

Thank you for choosing a Lisciani product. Our games are considered **the best educational** games thanks to their quality, the research behind them, their innovative features and our respect for the environment throughout the production process.

### LETTER DOORS

Randomly place all the little doors showing the letters of the alphabet and the little animal houses face up on the table. Keep the pieces that form the roofs aside. By matching the doors to the houses, children will learn to identify the letters of the alphabet and match the initial letter of each animal. The self correcting pieces will assist the child to complete the game.

### DECORATE THE HOUSE WITH THE COLOURED ROOFS

Once each animal house has been completed, by inserting the correctly shaped door in the slot, you can encourage the child to decorate the houses with the coloured roofs. The roofs are interchangeable, so you can decorate the house with any roof you wish.

### CREATE YOUR OWN CITY OF ANIMALS

When all the little houses have been assembled have fun creating city like environments for all the animals. With your encouragement your child will learn to recognise the names of the animals written on the houses, associating words and images.
