AND THE WINNER IS...

This Republic Attack Gunship is unlike most other LEGO® *Star Wars*™ sets we have released. For one thing, it was the first fan vote, and it is only the third Ultimate Collector Series model based on the *Star Wars* Prequels.

As LEGO *Star Wars* fans, you have shared your passion, ideas and creative takes on this beloved saga with us for more than 20 years. When we posted your top three fan requests on the LEGO Ideas website and asked you to vote for your favourite, we crossed our fingers and hoped a few thousand fans might participate. Nearly 53,000 of you voted! We are truly humbled by your dedication. So, it gives us great pleasure to present the long-awaited Republic Attack Gunship. Let your own Clone Wars begin.

Jens Kronvold Frederiksen

Design Director & Creative Lead,
LEGO® *Star Wars*™

MEET THE MODEL DESIGNER

Hans Burkhard Schlömer
LEGO® Star Wars™ Designer

We have released around 150 LEGO Star Wars playsets related to the Prequels (*The Phantom Menace*, *Attack of the Clones* and *Revenge of the Sith*), but until now, the only other UCS model based on the Star Wars Prequels were 10018 Darth Maul™ (2001) and 10215 Obi-Wan's Jedi Starfighter™ (2010).

We had seen several fan polls that listed the models on everyone's wish lists for the next "big" model, and the Republic Gunship, TIE Bomber and Nebulon-B Frigate kept popping up everywhere. So, we teamed up with the LEGO Ideas team to conduct an official poll of our own, and fans helped us spread the word.

The Republic Gunship received more than 30,000 of the 53,000 votes, smashing all LEGO Ideas records! This is an exciting chance to give fans something they really wish for, and for the adult Star Wars fans who were introduced to the saga through the Prequels, this model will definitely bring back happy childhood memories. It has the potential to become a collectible evergreen.

“THE SHROUD OF THE DARK SIDE HAS FALLEN. BEGUN THE CLONE WAR HAS.”

In *Star Wars: Attack of the Clones*, the Republic Attack Gunship, or Low Altitude Assault Transport (LAAT) plays a crucial part in the Battle of Geonosis. Obi-Wan Kenobi, Anakin Skywalker and Senator Padmé Amidala are on the verge of execution in the Petranaki arena when Jedi Master Mace Windu and a large group of Jedi arrive to help them. But surrounded by Count Dooku's Separatist Droid Army, the Jedi are fighting a losing battle.

As the droid army closes in on the surviving Jedi, six Republic Attack Gunships arrive with the first infantry of clone troopers led by Master Yoda. In a swift move, they create a protective perimeter around the Jedi, strike down the droid army, and our heroes are airlifted out of the arena. Count Dooku escapes with Obi-Wan and Anakin in hot pursuit, resulting in an inevitable, fateful lightsaber stand-off. But Dooku has already successfully transmitted the Death Star blueprints to his master. A thousand years of peace in the galaxy have come to an end. The Clone Wars have begun.

ABOUT THE REPUBLIC ATTACK GUNSHIP

This large gunship is equipped to serve multiple purposes. It is mainly designed to quickly and safely carry and deliver up to thirty Republic infantry troopers to or from an operation area. It also serves as a means of military goods transportation and reconnaissance. With lockers full of medical and survival kits, it's even equipped to handle medical evacuations and caring for injured troopers extracted from battle.

The gunship is also, as the name implies, heavily armed to support low altitude air-to-ground combat. Notice the laser cannons, air-to-air rockets and missile chutes as you build your model. And the front of those engine pods that look like air intakes? They are, in fact, scorched muzzles from rocket launches.

DESIGN DETAILS

LEGO® *Star Wars*™ fans asked for a big model - we listened. Although this model is not to minifigure scale, you can easily imagine it packed with battle gear and troopers en route to their destinations.

With a wingspan of just over 74 cm, the sheer size allowed us to incorporate many of the design features you will recognise from the movie model. The free-swinging doors on both sides are some of the largest moving parts we have ever created in a LEGO *Star Wars* model.

You will also find a total of ten printed windscreen elements (another record for us!): two for the cockpit capsule area, four for the automated guns in the wings, and another four for the turrets.

With the exception of the nose part below the pilot seats, the gunship is completely open. We wanted to make sure we incorporated adequate support for the model's considerable weight in the design. It required a frame that could be completely hidden by the exterior panels and leave enough room for the passenger compartment doors' lift-arms to move.

A light but sturdy support frame created the necessary structural stability, with the help of LEGO Technic elements.

STAR WARS
Republic Gunship

Manufacturer:	Advanced Technology Engineering
Year:	1997
Color:	White and Red
Length:	17.5 meters
Height:	10.5 meters
Weight:	1,200 kilograms

THE ORIGIN OF CLONE TROOPERS

In *Star Wars: Attack of the Clones*, Obi-Wan Kenobi discovers that Lama Su, prime minister of the planet Kamino, has been producing a clone army for the Republic, by order of the late Jedi Master Sifo-Dyas, a former leading member of the Jedi High Council. 200,000 units are ready to be dispatched, with another million in production.

The original clone host turns out to be the bounty hunter, Jango Fett, who now leads a comfortable life on Kamino with his young clone son, Boba. Jango flees after Obi-Wan suspects him of being involved in the plot to assassinate Senator Amidala. Obi-Wan tracks him to the droid foundries on Geonosis where Jango is ultimately killed by Master Windu in the Battle of Geonosis as Boba watches from the bleachers. The rest is *Star Wars* history.
